PROFILE

Senior Unity Developer with 7+ years of experience developing and shipping games for mobile and PC with end-to-end ownership of gameplay systems, architecture, performance, UI and animations. Brings strong software and systems-design skills and a solid physics and math foundation, with a drive for solving hard problems and building reusable tools and systems.

EXPERIENCE

Unity Developer - Candivore, PixelPie

2023-2026

BubbleStars — Mobile Game (PvP online bubble shooter)

- One of the core engineers on BubbleStars, working across gameplay, UI and meta. taking key features from technical design through production.
- **Gameplay:** Built core gameplay systems in **Photon Quantum's deterministic ECS**, with a focus on clean, data-driven, allocation-free code. Designed and built the game's loadout system - the core system every player interaction routes through - and its gadgets, one of the game's three core pillars, end-to-end from design through production.
- **UI & animations:** Developed major **UI systems** and player-facing features in close collaboration with artists and animators. Including screens infrastructures, transitions, HUD, reward views service, gameplay animation integrations and tooltip system.
- **Meta:** Involved in every part of the game's meta systems - player progression, rewards, events, shops, and modules - working with the backend team on the data models and configurations.
- **Performance & asset handling:** Improved performance and memory efficiency through profiling, pooling, async loading, designed and implemented the game's remote asset service
- **Bot AI (full ownership):** Owned the game's bot AI system end-to-end, including gameplay decision-making, difficulty balancing, and a custom automated benchmarking tool that runs thousands of simulated matches to validate every balance change.

Unity Developer - Creative Labs

2021-2023

Interactive Experiences - Hotwheels & Amdocs

- Developed interactive Unity applications primarily for HotWheels, integrating cameras, touchscreens, controllers, sensors, and body tracking and VR.

INDEPENDENT GAME DEVELOPMENT

Independent Unity Developer

2D Action RPG

- Full game ownership - design, art, sound and code.
- **Physics & AI:** Built a custom physics system and platforming-navigation from scratch, and a data-driven, goal-oriented AI framework for complex bots actions.
- **RPG Framework:** Built a full RPG framework covering complex combat systems, Progression, Quests, Dialogs, Skills, CutScenes and economy systems.
- **Custom tooling:** Building Unity Editor tools including coloring Hierarchy GameObjects and a custom node-based dialogue editor.
- **Shipped titles:** released 3 Android games and 1 PC title on Steam.

TECHNICAL SKILLS

GAMEPLAY & ENGINE

Unity C# Gameplay Systems

Animation Systems UI

Deterministic Multiplayer

Photon Quantum ECS

ARCHITECTURE & DESIGN

Software Architecture

Game Architecture System Design

Data-Oriented Design

Object-Oriented Design

Client Architecture

SYSTEMS & PERFORMANCE

State Machines Pluggable Features

Dependency Injection

Async Programming Performance

Asset Management

TOOLS & PRODUCTION

Custom Editor Tooling UI / Animation

Testing & Automation Git

FOUNDATION

Physics & Mathematics

EDUCATION

B.Sc. Physics & Computer Science

The Hebrew University of Jerusalem
